

Plant Capacity:	8.0 MGD
Foul Air Sources:	Headworks
Odor Treatment Technology:	Biotrickling filter followed by activated carbon
Treatment Media:	PUF and activated carbon
Foul Air Flow Rate:	20,000 CFM
Design H ₂ S Concentration:	25 ppm average 100 ppm peak
Design H ₂ S Removal Performance:	99.5% at average inlet
Commissioned:	2010
